

CAPTAIN DOGE WHITEPAPER

Mission Statement

Captain Doge is a BSC token focused on donating proceeds to veterans. It was developed by Donnie Etchieson, a veteran of the U.S. Army himself, to provide a unique, safe token while also supporting the needs of veterans.

Charity

Captain Doge donates 1% to charities for veterans of foreign wars. The first donation of \$1000+ was donated on July 9, 2021, going to the VFW Post 8762, an organization that provided over 6,000 meals for veterans during the COVID-19 pandemic in Sacramento, California. All donations will be streamed live and the recordings made publicly available.

More donations to more charities are planned for the near future, beginning in the Northern California region from the capitol to the bay. Long term goals include expansion beyond California to veterans of the United States in all states and, eventually, veterans of the world. Partnerships with larger veterans' organizations are also being proposed and pursued.

Tokenomics

Distribution is:

- 7% Liquidity Pool
- 2% Holders
- 2% Burn
- 2% Marketing Wallet
- 1% Donations

Maximum transactions are limited to 10 trillion tokens. Maximum wallet size is 20 trillion tokens.
